JSON Types

- Strings
- Numbers
- Booleans
- Null
- Array
- Objects

create .json file
↓
add in data type

Format: Key value pairs inside a block
```
{
  "key" : "value",
  "key" : "value" }
```

Eg → { "name" : "Pankaj",
        "age" : 21,
        "isProgrammer" : true,

        "hobbies": ["weight lifting", "cooking"],

nesting { "friends : [{
                        "name" : "Bhaturam",
                        "age" : 121,
                        "isProgrammer": false,
                        "friends" : [....] }],
        }
